Mary Miller

Dear Sponsors and Supporters of New Life Foundation: We want to give you an update on the developments with the Coronavirus in Moshi and specifically for the school. As of May 19, Tanzania is reporting 501 confirmed cases and 21 deaths. The country's president announced that the economy is more important than the threat posed by coronavirus and therefore intends to reopen the country to tourism. The US embassy is warning of the risk of exponential growth of Covid-19 cases in Tanzania. While the country's president has required social distancing, he does not believe there needs to be any restrictions on larger gatherings, including religious services.

The schools remain closed and individuals are experiencing the uncertainty of the virus and the impact on their daily lives and ability to receive the care and food they need. Pastor Shoo and his staff have been proactive in using the funds they have to provide care to their students and their families as well as their community. NLF has formed and been recognized by the local government as a Covid-19 Support Team. NLF has been joined in this effort by other organizations, individuals, and the government to provide needed supplies, and education about the virus and precautions to take, where the government is unable to do so like we experience here in the US.

Below are pictures of the supplies they are distributing.

Nutrious flour -

Yogurt, vitamins, sugar, rice, & frutis -

Washing hand bucket, liquid soap, sanitizer, & face masks -

They distributed these items on May 19, 2020 to a housing facility for the elderly, who received the care and supplies with great appreciation and tears of joy.

On May 21, they will begin distributing these supplies to the families of students and other vulnerable people in their community. These efforts are the outgrowth of NLF's mission to be the "Hands and Feet of Jesus" by caring for others in need.

Your continued giving of regular sponsorship donations, and special gifts for the Covid 19 needs through our web page makes this possible and allows these supplies to be purchased and provided as long as funding is available and the need exists. We continue to send as much as we can every 2 - 3 weeks. THANK YOU!!

Please continue to pray for all in Tanzania and the students and staff at New Life Fountain of Hope school. Let us know if you have any questions or if you have messages of encouragement and support you would like us to pass on to the NLF staff and students.

Blessings
